PEM

Promisec Endpoint Manager

The Challenge of Endpoint Security

PEM Can Help

Endpoint security remains a crucial and ever-evolving challenge for organizations, as threats continue to grow in complexity and sophistication. Conventional vulnerability management and compliance solutions often fall short, leading to error-prone and time-consuming processes, as well as costly and complicated integrations between assessment and remediation tools. Introducing PEM – a comprehensive cybersecurity solution designed to streamline endpoint security and simplify compliance management while staying ahead of emerging threats.

PEM

The Holistic Solution for Endpoint Security and Compliance

PEM delivers a complete vulnerability management experience, offering end-to-end capabilities in compliance and policy management, proactive security endpoint management, and advanced threat hunting. Its unique within-app remediation allows organizations to efficiently address vulnerabilities without relying on cumbersome and error-prone integrations between assessment and remediation tools. PEM is built to operate seamlessly on any network and remote device, utilizing a distinctive hybrid architecture that combines agent-less and agent-based models.

> "PEM has completely redefined how we manage our endpoint security. Its cutting-edge vulnerability management features and within-app remediation have enabled us to stay ahead of threats and ensure the timely resolution of critical vulnerabilities. PEM has been a game-changer for our organization!" – Moshe Shahar, CISO, Tnuva
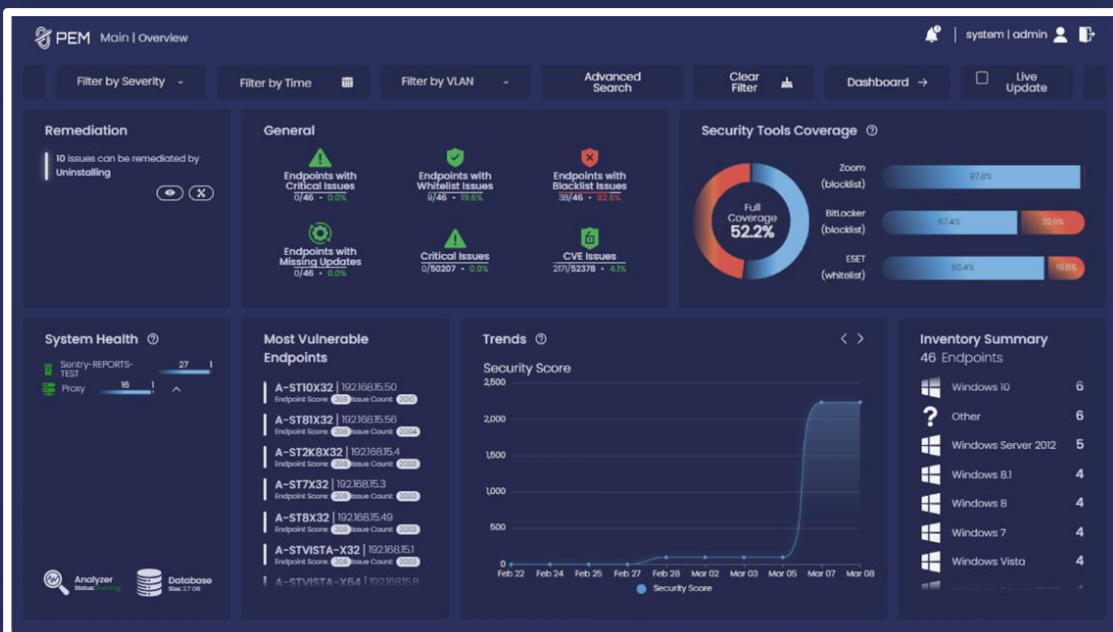

◉ Key Features and Benefits

End-to-End Vulnerability Management

PEM streamlines the vulnerability management process with endpoint **discovery**, vulnerability **detection**, **prioritization**, and **remediation.** We empower organizations to detect and resolve vulnerabilities across their network.

This issue can be remediated with Uninstall   Click Here To Remediate

Compliance and Policy Management

PEM provides a centralized platform for **policy and compliance validation**, automating compliance checks to minimize manual effort and errors while generating detailed audit and compliance review reports.

| Policy Validation	Compliance Adherence
GPO, App/Process/Service Blacklisting, Custom	CIS, ISO, NIST, HIPAA

Proactive Security Endpoint Management

PEM revolutionizes **endpoint security management**, offering comprehensive and centralized control over **security tools coverage**, enabling remote deployment of software, updates, and configurations, and featuring advanced **threat hunting** capabilities for proactive vulnerability identification and mitigation.

Security Tools Coverage

Full Coverage 76.9%
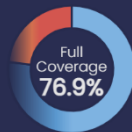

Anti Virus   76.9%   23.1%
