

AUTOMOX IS THE BETTER CHOICE FOR PATCHING

DOES YOUR RMM'S PATCHING LEAVE BOXES UNCHECKED?

Many RMM tools promise to be a one-stop solution, although many boxes are often left unchecked. Automox ensures you are building the best security posture possible for your clients with cross-operating system (OS) coverage, third-party patching, and hyper-fast, zero-day response times. And that's just the start.

CLOUD-NATIVE

No infrastructure to manage, rapid access to all of your customers' endpoints regardless of their technical infrastructure

MULTI-OS AND THIRD-PARTY PATCHING

Patch all devices in your client's environment from one pane of glass, from feature upgrades to third-party applications, across macOS®, Windows®, and Linux®

MULTI-TENANCY

Easily separate your clients into their own cloud-native tenant and manage their environment

DOCUMENTED COMPLIANCE

Help your customers adhere to the patch management requirements within HIPAA, GDPR, PCI DSS, NERC CIP, and other compliance standards

ROBUST API

Leverage our full REST-based API to integrate Automox with your existing RMM, PSA, or other tools

USAGE BILLING

Avoid any shelfware and only pay for what you use with monthly usage-based billing in arrears

FULL AUTOMATION

Automate remediation to fit your clients' schedules and still maintain control over manual approval

FULL DEVICE INVENTORY

View all of your customers' devices, their specifications, installed software, and missing patches or Flexible End-User Notifications - deliver custom patch notifications and the option to defer required reboots
