

Secure Financial Data And Maintain Compliance

Financial service attacks drive 94.6% of breaches. Riscosity enables organizations to detect and remediate security and privacy exposures for sensitive financial data. Helping organizations that offer financial services to understand what and where sensitive data is going so they can proactively manage third-party risks across vendors.

Financial Use Cases

Frictionless deployment on existing stack, no changes to existing codebase.

Riscosity automatically and continuously discovers, classifies and establishes rich context on the sensitive data you manage across your ecosystem.

Riscosity protects critical systems with continuous tracking, enabling fast adaptation to risks preventing network attacks.

Benefits

- ✓ **Third-party risk management** - Programmatically identify and classify which sensitive data is going to which 3rd party with unparalleled accuracy and without regular expression tuning
- ✓ **Continuous vendor monitoring** - Evidence to show if any PII is handled within the PRC within seconds.
- ✓ **Regulatory compliance** - Accelerate responses to compliance and privacy audits with a centralized sensitive data catalog across your ecosystem ensuring teams maintain compliance with policies that highlight exposures for ISO 27001, PCI-DSS, PSD 2, SWIFT CSP, SOX, GLBA, FINRA, NYDFS, CCPA, GDPR, and more.
- ✓ **Simple executive reporting** - Keep company leaders and stakeholders informed about the progress of cybersecurity initiatives, allowing them to track cybersecurity alignment against overarching company goals.

Get Started with SRC Cyber Solutions

At SRC Cyber Solutions LLP, we provide Next Generation, Highly Automated, User-Friendly and scalable solution. Our robust solutions include Comprehensive Email Security, Automated Patching and Endpoint Management, Asset Risk Visibility and Management with Policy Enforcement (ARM), Third-Party Data Flow Security solutions, Agentless Micro Segmentation, Endpoint Management and Compliance Platform and an Online Gamified Simulation Platform for Cybersecurity Training. Visit www.srccybersolutions.com to learn more.
