

Security, Privacy, And Data Sovereignty For Telecom

Millions of users depend on telecom companies and their services around the clock. This known dependency has resulted in telecom companies becoming a prime target for cyber attacks, making data security and resiliency a high priority. Riscosity is designed to empower teams at fast-paced telecom companies with full visibility and control of applications and APIs sending sensitive customer, operational, and financial data.

Telecom Use Cases

Identify if customer data is leaking into disallowed geographical jurisdictions. No agent installation needed, zero changes to codebase.

Accurately identify and correct unplanned customer data being sent to 3rd party data sub-processors. Reduce security and legal liability in minutes.

Meet FCC, ITU, EU CRA, and EO 14028 requirements by identifying and classifying outbound sensitive data, making prioritizing high-risk threats easy. Books by Riscosity significantly reduces evidence collection time from months to minutes.

Benefits

- **Understand and manage data flow risk** - Identify and classify which sensitive data is going to which 3rd party reducing accidental customer data leakage.
- **Data sovereignty and residency** - Maintain knowledge and control over the location of sensitive customer and operational data, globally.
- **Regulatory Compliance** - Identify and address regulatory compliance gaps to confidently meet and maintain compliance requirements, including FCC, ITU, EU CRA, EO 14028, GDPR, and more.
- **Effective executive reporting** - Keep C-level and stakeholders informed about data cybersecurity initiatives, and how customer data leakage risk is being actively reduced, allowing them to track alignment against company goals.

Get Started with SRC Cyber Solutions

At SRC Cyber Solutions LLP, we provide Next Generation, Highly Automated, User-Friendly and scalable solution. Our robust solutions include Comprehensive Email Security, Automated Patching and Endpoint Management, Asset Risk Visibility and Management with Policy Enforcement (ARM), Third-Party Data Flow Security solutions, Agentless Micro Segmentation, Endpoint Management and Compliance Platform and an Online Gamified Simulation Platform for Cybersecurity Training. Visit www.srccybersolutions.com to learn more.
