

PROJECT ARES®
The Next Generation
Cybersecurity
Training Platform

The Project Ares® Difference

Circadence's Project Ares is an immersive, gamified cybersecurity training platform that helps novice and seasoned cyber professionals keep their skills sharp against evolving cyber threats. Project Ares delivers persistent, true-to-life experiences that match and adapt to current threats. The platform uniquely combines machine learning, single- and multi-player exercises, and offensive and defensive missions that mirror real-life scenarios.

Delivers Unique Value

- Compelling back stories gamify cyber defense training
- High fidelity training using functional virtual machines
- AI-powered advisor provides in-mission support
- Support for Windows, Linux and Industrial Control System devices
- Trainer view allows for real-time spectator or instructor engagement

Key Benefits

- Cost-effective and persistent
- Increased learner retention
- Improved job performance
- Assess prospective employees
- Upskill existing employees
- Trainer view supports skills assessment

CUSTOMERS:

Enterprise

Government

Academic

Automate.
Elevate.
Persist.

State-of-the-Art Capabilities

Cybersecurity teams require real-time opportunities to practice skills and hone tactics. Project Ares is designed to appeal to the learning style of the next generation and can quickly and easily add new missions to address rapidly changing threats, tactics and tools.

Skill and Tool Training

- The constantly-evolving Mission Library offers offensive and defensive scenarios at varying levels of difficulty
- A fully-loaded Media Center provides cybersecurity educational content via videos, documents and key sites
- Games provide specific skill practice (work role certifications, matching log ports and protocols, and more)

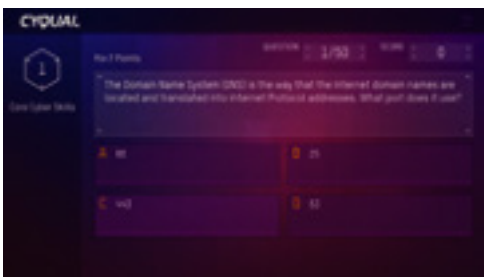

Team Training

- Trainer view to shadow or engage players
- Chat service provided for advisor interaction and team play
- Player performance is recorded and awarded by a showcase of skills, trophies and badges

Cutting-Edge Machine Learning

- In-game advisor for guidance through game
- Automated adversary responds to players
- Automated scoring of player and opponent actions with replay for objective assessment
- Player actions drive models on best tactics

High-Fidelity Cyber Range

- Each mission spins up an individual cyber range
- Public and private back-end cloud technology for mission storage
- HTML5 web browser client

The Value of Project Ares

Circadence's Project Ares is an award-winning, immersive, gamified cybersecurity learning platform that helps students of all cyber competency levels apply learned concepts to real-world scenarios to build skills for the workforce. Project Ares delivers persistent, true-to-life experiences that match and adapt to current threats. The platform uniquely combines machine learning, single- and multiplayer exercises, and offensive and defensive missions that mirror real-life scenarios.

Partnering in India together: Circadence and SRC Cyber Solutions LLP
