

Solution Brief

IRONSCALES Email Security Packages

We offer a variety of packages to meet your unique email security needs

“Before IRONSCALES we needed multiple engineers to hunt down a malicious email, understand what the compromise was, where the email was sent, and then go to those users and make sure their own inboxes were not compromised. To have an engineer doing that for five or six hours a day is a waste of their time and skills. They don't have to do that anymore. IRONSCALES frees up their time for more important things.

RUBEN VEGA, DIRECTOR OF IT INFRASTRUCTURE, UNIFIED WOMEN'S HEALTHCARE
