Maximize the impact and reach of your Rapid7 investment

THE CHALLENGE: MOVING FASTER THAN ATTACKERS

Speed is key – from fixing vulnerabilities fast to quickly collaborating across SecOps and ITOps teams. Unfortunately, legacy tools and fragmented workflows slow down remediation efforts, extending your exposure and opening you up to risk.

JOINT SOLUTION

Automox complements your investment in Rapid7 by delivering a full-cycle vulnerability remediation and collaboration solution. The Automox Plugin for Rapid7 InsightConnect supercharges InsightVM with pre-built, but configurable workflows. Once installed, the InsightConnect workflows can automatically upload Rapid7 InsightVM vulnerability scan results to Automox where the vulnerability records will be prioritized into single-click remediation actions with a second workflow for initiating device queries within Slack or Microsoft Teams.

From vulnerability remediation to shared device data and context, Automox leverages your Rapid7 investment to fix vulnerabilities fast and improve cross-team collaboration with automated workflows and ChatOps – all so you can regain important hours in your day.

FIGURE DESCRIPTION:
Complement your Rapid7 investment and fix vulnerabilities fast with the Automox Plugin for Rapid7 Platform.

FIX VULNERABILITIES FAST

Rapid7 InsightVM and InsightConnect with Automox Vulnerability Sync enables full-cycle vulnerability management by automating the tedious and mundane manual tasks in traditional patching and remediation routines.

Close your window of exposure in minutes – not months – by automating the patch deployment and installation of vulnerabilities detected by InsightVM. Now you can take action with a single click and effortlessly remediate vulnerabilities to close the loop in a fraction of the time spent with manual operations.

Take your time back by automating tedious, manual steps that delay response times

All your endpoints, always current with automated vulnerability syncing and single-click remediation

Meet SLAs in a snap through rapid vulnerability identification and ChatOps-fueled workflows

WANT TO SHARE INSIGHTS AND COLLABORATE WITH YOUR PEERS?

Collaborate in real-time using Automox and Rapid7's interactive ChatOps workflows and instantly query device data, create customizable alerts, and sync with other data sources for deeper insights and trends.
