Solution Brief

Phishing Simulation and Training

Deliver the Right Training at the Right Time for the Right Person

The Challenge

Finding the balance between maintaining a high level of email security awareness and impacting employee morale and productivity is an ongoing challenge. Understanding who is being targeted and which employees are doing better than others is critical to success, as a security program is only as strong as its weakest link. Our built-in training capabilities, which are included with our service, are designed to provide highly personalized, reality-based training content to employees only when they need it is the right solution.

Employees are the last line of defense against email-based cyber attacks. Maintaining a strong level of company-wide security awareness about how to spot phishing emails is an important part of any company security program. IRONSCALES can help.

Phishing Awareness Training for Every Employee

Your training program should meet employees where they are. Training can be easily customized by role, function, access level, geography, device type and more. The exercises are fun, engaging and based on real-world threats.

The Solution

The IRONSCALES platform provides security teams with the capability to design, deploy and track phishing awareness training campaigns in a simple, fast and effective manner:

Launch Campaigns with auto-generated content sourced from recent real-world attacks

Create Campaigns in just one click

Upgrade to Premium awareness training to take your security awareness efforts to the next level

Departments Campaigns 2020 Q2: 38 Participants

Money Transfer Scenario: 18 Participants

Healthcare Scenario: 8 Participants

Gift Cards Scenario: 12 Participants

Finance Department

HR Department

Product Department

Phishing Simulations Built on Real-World Activities

Traditional phishing simulations rely on fictional or outdated scenarios. Our simulations leverage reality-based scenarios that have been identified and sent to us by the thousands of security teams that comprise our Community. You will be able to test your team against the latest types of attacks like credential theft, invoice fraud, vendor account compromise and more.

94% of all cyber attacks use email as their attack vector

## One-Click Campaigns and Auto-Generated Content

From our platform, security teams can launch training campaigns in just one click. Our campaigns leverage auto-generated content based on the awareness level and phishing susceptibility scores of those included in the simulated attack scenario being deployed.

Click rates on phishing emails vary from **6% to 16%** depending on the industry
Why choose IRONSCALES?

1. We are fast to deploy, simple to manage and highly effective in stopping all types of email attacks

2. We deliver email security in the mailbox and defend against modern email threats

3. We integrate both email security and awareness training into a single offering

ABOUT SRC CYBER SOLUTIONS LLP

At SRC Cyber Solutions LLP, we provide Next Generation, Automated and User-Friendly solutions in partnership with AUTOMOX for Patch and Endpoint Management, IRONSCALES for Comprehensive Email Security and Anti-Phishing Protection, THREATX for WAAP (WAF++) with an Attack-Centric approach for Web Application and API protection and Project Ares for Online Gamified Simulation-based Cyber Security Training.
