2021

STATE OF IT OPERATIONS REPORT
HIGHLIGHTS NEED FOR:

Cloud-Native

Automation

Security

THE BURDEN OF REMOTE WORK
ON IT OPERATIONS:

| Thousands of new devices, endpoints, and support requests | On-premises tools and infrastructure | Manual processes |

80%
AGREE THAT ENDPOINT MANAGEMENT
Became more difficult due to remote work

THE CONSEQUENCE:
## CRITICAL VULNERABILITY EXPOSURE

60%
REPORT IT TAKES THEIR ORGANIZATION

More than 3 days to patch cloud and remote devices and **over 30 days** to patch remote laptops, remote desktops and cloud servers.

LEAVING ORGANIZATIONS EXPOSED & AT HIGH RISK FOR A CYBERATTACK AND IN NEED OF AUTOMATION

The new normal requires a new approach – automating remote IT operations to enable real-time visibility and control over diverse, shifting IT environments.

93%
SURVEY PARTICIPANTS

Plan to switch to at least some cloud endpoint management solutions within the next two years.

AUTOMOX
